

Patient Journey

NHS

GP referral required. Initial appointment is with a member of the fertility team at Complete Fertility Centre in Southampton or Bournemouth

Private

Patient can self refer. Initial appointment is with a fertility consultant at Complete Fertility Centre in Southampton or Bournemouth. Private appointments will be sooner than an NHS Fertility Clinic appointment

Investigations required before initial appointment

FSH, LH, Oestrogen, Progesterone, Chlamydia and Rubella for females, and Semen Analysis for males, must all be undertaken by your GP

Initial Appointment (NHS or Private) at Complete Fertility Centre Southampton or Bournemouth

Will discuss:

- Patient's fertility history
- Results of investigations and ultrasound scan
 - Pros and cons of treatment options
- Whether assisted conception is required and best treatment option

Counselling

We encourage patients to meet with our Counsellor for emotional support

Assisted Conception Treatment Consultation at Complete Fertility Centre Southampton or Bournemouth

With one of our fertility doctors you will discuss:

- Aspects of treatment and written consents
- What happens next/during fertility journey
 - Drug prescription
 - Q&As

Nurse Planning Consultation at Complete Fertility Centre Southampton or Bournemouth

Nurse talks through treatment schedule and how to administer drugs

Treatment starts

Drugs delivered directly to patient's home. Treatment usually takes 4 weeks and starts on day 1 of period
