

Choosing Your Clinic

If you are having trouble conceiving, you are not alone. One in six couples in the UK experience difficulties conceiving.

Here at **Complete Fertility** we provide a **professional, friendly service** supported by the latest IVF technology and experienced clinicians.

There are several factors that can affect fertility and therefore your chances of getting pregnant. If you have been trying to conceive for a year or more with no success (or sooner if you are after the age of 36), we recommend booking an appointment with a fertility consultant who can assess your fertility and **help you become pregnant sooner**.

Whether it's a **fertility check-up or fertility advice** and assisted **conception treatment**, Complete Fertility can help you on your fertility journey to have the best chance of a healthy baby. Book an appointment or come along to one of our **free events** for people thinking about starting fertility treatment.

Complete Fertility offers:

- World-class success rates
- IVF, ICSI, egg share, IUI, FET and fertility treatments with donor eggs and sperm
- Competitive packages and interest-free plans
- NHS and private patients welcome
- NHS outpatient clinic
- Convenient clinics in Southampton and Bournemouth
- Strong emphasis on patient support
- Treatment for heterosexual couples and the LGBT community

Understanding IVF and fertility treatment cost can help you plan. Patients are asked to note that payment is due prior to each treatment cycle. No further procedures or investigations will be carried out if any invoices are still outstanding. To find out more about how we can help, please contact us on:

02380 010 570 or cfc.private.coordinator@completefertility.co.uk

These prices are effective from 1st July 2023 and supersede all previous price lists. Prices are subject to change without notice.

There will be no refund if elements of the package are not used.

Pre-Treatment

Before we can recommend a treatment pathway you will need to have a **consultation with a doctor** and may need a **combination of investigations**. This will allow us to advise you on the best treatment journey for you.

At **Complete Fertility Centre** we offer a range of simple fertility tests to assess your overall reproductive health and identify any potential fertility issues that might be affecting your chances of conceiving.

We have a **counselling service** here to help offer emotional support before, during and after your treatment, should you wish to access it.

Counselling

Up to **six sessions of counselling are included** whilst you are receiving treatment at Complete Fertility and for up to six months after your last treatment cycle.

	Additional counselling appointment per session.	£115
	<i>Failure to attend counselling appointment if less than 24 hours' notice provided.</i>	£50

Initial Private Medical Consultation

	A first appointment with one of our consultants to discuss your fertility history & the results of any investigations you have had already, & a recommendation of further investigations will be required.	£225
	<i>Failure to attend medical consultation appointments if less than 24 hours' notice provided.</i>	£100

Follow-up Consultation

	An additional follow up consultation is required for all patients to discuss results.	£150
	<i>Failure to attend follow-up consultation appointments if less than 24 hours' notice provided.</i>	£100

Fertility Check-ups

Our fertility check-up aims to offer you a **comprehensive overview** of your fertility.

Here at Complete Fertility, we understand that you may be wondering about your fertility health. It may be that you're in a relationship and are thinking about trying to conceive in the future or you're actively trying now, or you may be single and have concerns about your fertility.

Whatever your circumstances it is worthwhile **monitoring your fertility levels** to support your family planning. Our fertility check-up can be performed individually or as a couple to evaluate your fertility.

Fertility check-up package prices are required for all patients that have not previously had any fertility investigations or treatment.

Fertility check 1 (patients assigned as female at birth)

£460

- Lifestyle & health questionnaire
- Blood test: AMH
- Ultrasound scan
- Results of your fertility status, influencing factors & ways to improve it explained by a consultant

Fertility check 2 (patients assigned as male at birth)

£325

- A semen analysis to measure the quantity & quality of sperm
- Results evaluated & explained by a consultant

Couple (patient assigned female at birth and partner assigned male at birth):

£560

- Fertility check 1 combined with semen analysis

Couple (both partners assigned as female at birth):

£695

- Fertility check 1 for both partners

Premium Enhanced Fertility Check-ups

Within the premium package, in addition to a scan and an AMH test, patients would get a more comprehensive testing of their reproductive hormonal status, thyroid function and Vitamin D status.

The package excludes specific disease profile, e.g., PCOS or premature menopause.

Fertility check 3 (patients assigned as female at birth)

- Lifestyle & health questionnaire
- Blood tests: AMH, Day2-4 FSH/LH, TSH T4 Vit D, Prolactin, Rubella, Chlamydia & including day 21 progesterone
- Ultrasound scan
- Results of your fertility status, influencing factors & ways to improve it explained by a consultant

£575

Fertility check 4 (patients assigned as male at birth)

- A semen analysis to measure the quantity & quality of sperm
- Results evaluated & explained by a consultant
- Blood test: FSH, LH, Testosterone (AM sample)
- Sperm DNA fragmentation testing

£545

Couple (patient assigned female at birth and partner assigned male at birth):

- Fertility check 3 combined with semen analysis

£675

Couple (both partners assigned as female at birth):

- Fertility check 3 for both partners

£900

HyCoSy

It is not possible to see the tubes with normal x-rays or ultrasound, so a specialised examination must be performed. You will have a transvaginal ultrasound first. This is a routine gynaecological procedure and does not hurt.

We aim to perform this procedure **between day 8 and 18 of your cycle**. Please note that we will not be able to do the examination if you are still bleeding from your period or if there is a chance that you may be pregnant. If you are unsure, please phone us.

If there is a failed HyCoSy attempt, then there will be a 25% refund.

- HyCoSy stands for Hysterosalpingo Contrast Sonography, & it is used for investigating the cavity of the uterus & the fallopian tubes to see if an egg can travel down them with ease (this may be required if the cavity or tubes are damaged, & it is difficult to become pregnant). £550

Trans-Vaginal Ultrasound Assessment Scan

- This is an assessment scan which is required to examine & take images of the pelvic anatomy. It helps to see if there is any abnormality in the uterus (womb), cervix (the neck of the womb), endometrium (lining of the womb), fallopian tubes, ovaries, bladder, or the pelvic cavity. £195

Hysteroscopy & Biopsy Package

- A hysteroscopy is a procedure to look at the inside of your uterus (womb) using a small telescope. A biopsy (removing small pieces of tissue from the lining of your womb) is performed at the same time and includes histology. £1190

If there is a failed hysteroscopy attempt, then there will be a £100 refund.

Hysteroscopy

A hysteroscopy is a procedure to look at the inside of your uterus (womb) using a small telescope.

£850

If during the hysteroscopy it is determined a biopsy is required (removing small pieces of tissue from the lining of your womb) then is performed at the same time for an additional cost of £340.

If there is a failed hysteroscopy attempt, then there will be a £100 refund.

Endometrial Biopsy

A biopsy of the endometrium without assessing the endometrium visually may be required. This is similar to a smear test in terms of being examined & then a small tube is passed through the neck of the womb to take the biopsy. This includes histology.

£350

Occasionally, your doctor may advise a sampling of other tissue/fluid e.g., polyp, fluid from ovarian cysts for diagnostic purposes. The prices will vary for these procedures.

£80-£400

Zymot

Zymot is a Sperm separation device used to process sperm during a treatment cycle, further information is available on request.

£200

Semen Analysis

A semen analysis may be required, which is an examination by microscope of the number of sperm in a semen sample (sperm count or concentration), how they swim (motility) & their shape (morphology). We also assess the sperm to see if there are antibodies present that could cause the sperm to stick together.

£195

Following your semen analysis, a report will be written & sent to either you or your referring doctor and kept on file at Complete. A semen analysis gives your doctor important information about your fertility, & if you're seeking treatment, will also help the doctor decide which type of treatment is right for you.

Sperm DNA Fragmentation

A Sperm DNA fragmentation test may be recommended. This is a specialist test performed to **check sperm quality and sperm DNA damage**. Good quality sperm DNA is vital for normal fertilisation, embryo development, and successful implantation and pregnancy in both natural and assisted reproduction. Some early studies have suggested that poor sperm DNA may be associated with recurrent miscarriage and lower success rates for some patients that have had repeated attempts at IVF.

This test is only recommended by a doctor in specific circumstances, and you will be given information about the test and its relevance for you at the time of referral. It can take up to a month for test results to be fully processed. When you book your test, we will also usually arrange a follow up appointment for you and your partner to discuss the results with your doctor.

Sperm DNA fragmentation test

£500

Screening Packages

Below are comprehensive packages of tests which may be recommended to **assess individual patient treatment needs** and will allow for our consultants to plan with you the best possible treatment pathway for you.

Hormone Profile

Hormone Profile Package (Patient assigned as female at birth)

£295

Fees include:

- | | |
|-----------------------|------|
| • LH | £40 |
| • FSH | £40 |
| • Day 21 progesterone | £40 |
| • Prolactin | £40 |
| • Oestradiol | £40 |
| • AMH | £120 |

Fees exclude:

- | | |
|-------------|-----|
| • Chlamydia | £70 |
| • Rubella | £50 |

Hormone Profile Package including Chlamydia & Rubella

£395

(Patient assigned as female at birth)

As above but with Chlamydia & Rubella screening included

Hormone Profile Package (Patient assigned as male at birth)

£180

Fees include:

- | | |
|----------------|-----|
| • FSH | £40 |
| • LH | £40 |
| • Testosterone | £40 |
| • Prolactin | £40 |
| • SHBG | £40 |

Menopause Profile

Menopause Profile Package

£180

Fees include:

- | | |
|--------------|-----|
| • LH | £40 |
| • FSH | £40 |
| • Oestradiol | £40 |
| • TSH | £40 |
| • FT4 | £40 |

PCOS Profile

PCOS Profile Package

£325

Fees include:

- | | |
|-----------------|-----|
| • Testosterone | £40 |
| • SHBG | £40 |
| • FSH | £40 |
| • LH | £40 |
| • Glucose | £40 |
| • Insulin | £45 |
| • Lipid profile | £40 |
| • FT4 | £40 |
| • TSH | £40 |

Thyroid Profile

Thyroid Profile (long) Package

£140

Fees include:

- | | |
|--------------------------|-----|
| • Thyroid function tests | £40 |
| • FT3 | £40 |
| • Thyroglobulin abs | £45 |
| • Thyroid peroxidase | £40 |

Thyroid Profile (short) Package

£70

Fees include:

- | | |
|--------------------------|-----|
| • FT3 | £40 |
| • Thyroid function tests | £40 |

Ovarian Cyst Fluid for Cytology

●	Cell block/immunochemistry additional if required	£255
---	---	------

Genetics

●	Genetics Package (Patient assigned as female at birth) £995	
	Fees include:	
	• Karyotype	£495
	• CF carrier screen	£365
	• Fragile X	£255

●	Genetics Package (Patient assigned as male at birth) £995	
	Fees include:	
	• Y chromosome microdeletion	£255
	• Karyotype	£495
	• CF carrier screen	£365

Recurrent Miscarriage

●	Recurrent Miscarriage Profile Package £1,100	
	Fees include:	
	• FBC	£40
	• Coagulation profile	£40
	• Antithrombin III	£40
	• Factor V Leiden common mutation	£115
	• Factor II prothrombin common mutation	£115
	• Fibrinogen	£40
	• Lupus anticoagulant	£135
	• Protein C	£125
	• Protein S	£125
	• Anticardiolipin abs	£40
	• Karyotype	£495

Thrombophilia Screening

Thrombophilia Screening Package

£495

Fees include:

- | | |
|-----------------------------------|------|
| • FBC | £40 |
| • Coagulation profile | £40 |
| • Antithrombin III | £40 |
| • Factor V Leiden common mutation | £115 |
| • Lupus anticoagulant | £135 |
| • Protein C | £125 |
| • Anticardiolipin abs | £40 |

Karyotype

Couple Karyotype plus SpermComet Package

£1,350

Fees include:

- | | |
|--------------------|------|
| • Karyotype (each) | £495 |
| • Sperm Comet | £339 |

Congenital Adrenal Hyperplasia

Congenital Adrenal Hyperplasia Package

£170

Fees include:

- | | |
|--|-----|
| • 17 hydroxyprogesterone | £45 |
| • Testosterone | £40 |
| • Androstenedione | £50 |
| • Dehydroepiandrosterone sulfate (DHEAS) | £50 |

Viral/Infection Screens

●	HIV, Hep B & Hep C	
	• Single patient	£160
	• Couple	£310
●	HIV, Hep B & Hep C & Chlamydia	£225
●	HIV, Hep B & Hep C, Chlamydia & Rubella	£270
●	HTLV1 & 2	£105

1.25 Vitamin D

●	Vit D3 Profile	£70
---	-----------------------	-----

STD

●	<u>Serology</u>	
	Syphilis IgG/IgM	£50
	<u>Urine test</u>	
	Chlamydia	£70
	Gonorrhoea	£60
	Chlamydia & Gonorrhoea	£120
●	STD Package	£170
	Fees include:	
	• Swabs for microbiology	£50
	• Swabs for Chlamydia	£50
	• Urine test for Chlamydia & Gonorrhoea	£120

Pre-Treatment Blood Tests

Pre-treatment Blood Tests Package

£220

Fees include:

- AMH
- Rubella
- Chlamydia

£120

£50

£70

Trial Embryo Transfer / Trial Insemination

If we anticipate there may be complications passing a catheter through the opening of the cervix, we recommend a trial embryo transfer prior to treatment (trial insemination for IUI procedures).

£195

Ovarian Cyst Aspiration / Follicular Drainage

Occasionally, we may be required to extract fluid from your ovaries. This may be performed under local anaesthetics or with sedation.

£200

Fees exclude:

- Sedation (if required)

£580

Zika

Zika Test, if applicable (each)

£150

Donor Sperm

●	Donor Sperm for 1 cycle (incl. storage for 12 months from reservation)	£1,300
	Donor Sperm for 3 cycles (incl. storage for 12 months from reservation)	£3,400

Known Donor Sperm Package

- If you have someone in mind who you would like to be your sperm donor, we can offer a known donor sperm package. **£2,500**

Fees include:

- Semen analysis, pre-donation, post-donation & final screening tests, donor counselling, up to 5 freeze appointments, 3-month quarantine period & sperm storage for 12 months

Fees exclude:

- Treatment for sperm recipient

Surgical Sperm Retrieval (SSR)

- For patients who are not producing sperm in their semen, sometimes a surgical sperm retrieval is recommended.

- Onsite Surgical Sperm Retrieval (**PESA/TESA**), virology screening (HIV, Hep B & Hep C) **£2,750**
- Offsite (within 15miles) Surgical Sperm Retrieval (**M-TESE**), virology screening (HIV, Hep B & Hep C) & Embryologist Fee **£955**
Procedure is performed off-site under general anaesthetic & paid directly to Spire Southampton Hospital – indicative fee includes sedation (approx.) **£3,400**

Fees exclude:

- SSR Sperm freezing & storage for 1 year **£600**
- Sperm storage per additional year **£350**
- Sedation **£580**

Follow-up Consultation

- An additional follow up consultation is required for all patients to discuss results. £150
- *Failure to attend medical consultation appointments if less than 24 hours' notice provided.* £100

Treatment Planning Consultation

- This is required prior to the start of your chosen fertility treatment. Your consultant will run through a treatment check list, confirm your treatment option by discussing the pros & cons of the chosen treatment option including the likelihood of success & possible side effects. They will then develop your personal treatment plan with you to give you the best chance of achieving a healthy pregnancy. £200
- *Failure to attend treatment planning consultation appointments if less than 24 hours' notice provided.* £100

Nurse Consultation

The next appointment which is required is with one of our nurses who will talk through your treatment schedule as advised by your consultant in more detail, run through your consents and go through how to administer any medication required. This involves completing legal documentation in relation for your upcoming treatment. In addition, the treatment protocol and drugs information will be discussed in detail. By the end of this appointment, you should feel more confident in understanding the fertility process you are about to embark upon.

- When booking a nurse consultation as part of a treatment package patients you will receive an invoice for the package balance that must be paid prior to your treatment starting. £200
- *Failure to attend nurse consultation appointments if less than 24 hours' notice provided.* £75

Treatment

For some couples the journey to parenthood isn't as simple as they hoped. Fortunately, advances in assisted conception treatments can **make a real difference**.

At Complete Fertility we offer a range of fertility treatments to give you the **best possible chance** of having a baby. Our caring team works with you to develop a personal conception plan, giving extra one-to-one doctor, nursing, and embryologist time to perfect it.

We provide you with all the support you need to help you through every stage of the process. Our friendly fertility nurses are available to answer all of your questions and our professional counsellors are on hand to provide ongoing personal and emotional support.

IVF Packages

In vitro fertilisation (IVF), which literally means "fertilisation in glass", refers to assisted reproduction that takes place outside of the body.

During the IVF process, eggs are removed from the ovaries and fertilised with sperm in the laboratory. The fertilised egg (embryo) is later placed in the womb. If the treatment is successful, an embryo will implant in the lining of the womb. The patient will then be pregnant, as if they had conceived naturally.

IVF can be performed with the single egg that is produced naturally each month, but this is inefficient and has low success rates. Therefore, in the majority of treatment cycles, the patient undergoes stimulation of the ovaries with fertility hormones so that several eggs are obtained. This process is called superovulation.

The production of several embryos means that the best quality embryos can be placed, thus improving success rates. It can also result in the production of "spare" embryos. Good quality spare embryos may be frozen to allow placement at a later date without the need for hormone stimulation. This maximises the chance of pregnancy from one egg collection.

Package Fees include:

- Pre-treatment screening tests (HIV, Hep B & Hep C) for both partners
- Consultations – Treatment Planning, nursing, embryology & one follow-up within 3 months
- All ultrasound scans whilst in treatment
- Any in-treatment hormone blood tests
- Counselling
- Egg retrieval (including sedation)
- Blastocyst culture & EmbryoScope
- Embryo transfer, where applicable
- Early pregnancy scan, where applicable

● Package Fees exclude:	
• Chlamydia, Rubella & AMH	£50-£240
• HFEA Fee (Human Fertilisation & Embryology Authority), where applicable	£85
• ICSI Fee, refunded if not required.	£1,350
• All drugs required for your cycle, approximately (excl. DuoStim)	£1,800-£3,000
• Sedation for embryo transfer	£580

● Complete IVF Package	£5,400
-------------------------------	---------------

● Subsequent IVF Package	£4,650
Discounted subsequent IVF Package within 12 months of 1 st egg collection <i>Screening tests may be required if expired from previous cycle</i>	

● Complete IVF DuoStim Package	£8,300
Fees include:	
• Nurse Consultation (this will cover consents & injection training)	
• 2 egg collections & embryo freeze cycles	
Fees exclude:	
• All drugs required for your cycle, approximately <i>If there are other unexpected permutations of events, we will need to further individualise costs.</i>	£3,000-£4,500
• ICSI, if required	£1,350
• Zymot, if required for ICSI	£200

● Complete Embryo Freeze Package	£4,750
• Includes embryo freezing & storage for 1 year	
• Excludes ICSI fee (if required for your treatment)	
• Zymot, if required for ICSI	£200

● Extras if required:	
• Egg/Embryo Freezing & storage for 1 year, where applicable	£600
• ICSI Fee	£1,350
• Zymot, if required for ICSI	£200
• Donor Sperm for 1 cycle (incl. storage for 12 months from reservation)	£1,300
• Donor Sperm for 3 cycles (incl. storage for 12 months from reservation)	£3,400
• Other Pre-treatment Blood Tests e.g., AMH (£120), Rubella (£50) and Chlamydia (£70)	£50-£240
• Trans-vaginal Ultrasound Assessment Scan	£195

Frozen Embryo Transfer (FET) Package

A frozen embryo transfer is when frozen embryos from a previous IVF or ICSI cycle are thawed and placed in the womb.

Typically, 50% of IVF and ICSI patients will have other good quality embryos to freeze, after having had their best one or two transferred, although the chances of having any embryos to freeze varies significantly on age and other medical factors, which your consultant can discuss with you. If couples wish, the healthy embryos not transferred may be frozen for later cycles. This allows you to attempt pregnancy again without going through the complete IVF process, avoiding stimulated egg growth and the accompanying injections.

Fees include:

£2,300

- Medical & Nurse Consultations & follow ups within 6 months
- Screening tests (excluding Rubella & Chlamydia)
- Ultrasound Scans
- Early Pregnancy Scan
- Blastocyst Culture, if appropriate

Fees exclude:

- | | |
|--|-----------|
| • HFEA Fee | £85 |
| • All drugs required for your cycle, approximately | £250-£700 |
| • Sedation | £580 |

Intrauterine Insemination (IUI) Package

Intrauterine Insemination (IUI) is a fertility treatment whereby the patient is helped to conceive by specially prepared sperm being placed directly into the womb at the time when eggs are being released. Production of eggs is helped by the use of fertility drugs. When you are about to ovulate, the most motile sperm will be used for insemination.

If you are using sperm from a donor this is known as donor insemination (DI). It is carried out when sperm are completely absent, the partner has a very low sperm count or if they carry a genetic disorder.

For patients having IUI with donor sperm, we have our own in-house sperm bank. All our sperm donors are background checked with extensive screening and full medical examinations. Donors can be selected based on their physical characteristics, their employment, education, and hobbies. You also have the option to import sperm from another agreed centre, if we do not have a donor in our own bank who matches your desired characteristics (this may incur transportation charges, see below transport and storage section). Alternatively, you can use a known sperm donor.

All patients having treatment using donor sperm are required to use our counselling service, to fully explore the implications of donor insemination, before making any final decisions.

Package Fees include:

- Pre-treatment screening tests (HIV, Hep B & Hep C) for both partners
- Consultations – nursing, sperm preparation & follow up within 6 months
- Ultrasound Scans
- Any in-treatment hormone blood tests
- Counselling
- Early Pregnancy Scan

Package Fees exclude:

- | | |
|--|-----------|
| • Treatment Planning Consultation | £200 |
| • All drugs required for your cycle, approximately | £150-£350 |
| • Sedation | £580 |

Complete IUI Package

£1,250

Subsequent IUI Package within 12 months of 1st insemination

£1,100

Screening tests may be required if expired from previous cycle

Extras for DI-IUI, if required

- | | |
|--|----------|
| • Donor Sperm for 1 cycle (incl. storage for 12 months from reservation) | £1,300 |
| • Donor Sperm for 3 cycles (incl. storage for 12 months from reservation) | £3,400 |
| • Other Pre-treatment Blood Tests e.g.,
AMH (£120), Rubella (£50) and Chlamydia (£70) | £50-£240 |
| • HFEA Fee | £37.50 |

Egg Freezing Package

Egg freezing offers the option to start a family when you are ready without worrying about your biological clock.

You might choose egg freezing if you are:

- considering postponing childbearing for social reasons
- considering cancer treatment or other treatment that may cause you to lose your fertility
- at increased risk of premature ovarian failure or early menopause
- wishing to undergo a sex change

Age is a major factor when considering egg freezing. Fertility is at its peak for individuals in their 20s. You have the most eggs and the highest quality eggs when you are young. Ideally, you should have this procedure in your twenties or early thirties, but you can consider it later on. You should discuss this with your consultant who can give individual guidance.

The egg freezing process includes:

1. Pre-treatment screening tests – to determine if egg freezing is a good option for you
2. Egg production stimulation – our team of experts will monitor and enhance your ovulation to increase egg production
3. Egg collection – a 30-minute procedure under ultrasound guidance
4. Egg freezing – using a process called vitrification your eggs are rapidly frozen to -196 °C in liquid nitrogen
5. Egg storage – your frozen eggs are stored in one of our secure tanks containing liquid nitrogen until you choose to use them to become pregnant

One Cycle

£4,200

Subsequent Cycles within 12 months of 1st egg freeze

£2,000

Fees include:

- Pre-treatment screening tests (HIV, Hep B & Hep C)
- Consultations – medical, nursing & embryology ultrasound scans
- Counselling
- Egg retrieval
- Egg freezing & storage up to 1 year

Fees exclude:

- Stimulation drugs, approximately **£1,600-£2,000**
- Egg storage per additional year **£350**

Egg Thawing Package

The egg thawing package is for patients who wish to use their frozen eggs to generate embryos and then have an embryo transfer. Because of the way that eggs are frozen, they must then be inseminated by ICSI, which is included in the package price.

Your menstrual cycle will be controlled with medication and your eggs thawed at the appropriate time in your cycle. They will then be inseminated with ICSI. Any embryos that develop will be grown in the laboratory for up to five days, the best one or two transferred, and any other good quality embryos can be frozen.

Fees include:

- Egg thaw consultation & nursing consultations
- Ultrasound Scans
- Thawing of eggs & fertilisation using ICSI
- Blastocyst Culture & Embryoscope
- Embryo transfer
- Early Pregnancy Scan

Fees exclude:

- | | |
|--|-----------|
| • HFEA Fee, where applicable | £85 |
| • All drugs required for your cycle, approximately | £250-£750 |
| • Sedation | £580 |
| • Zymot, if required | £200 |

Egg Thawing Package

£4,000

Subsequent Egg Thawing Package

£3,400

Discounted subsequent Egg Thaw Package within 12 months of 1st egg thaw
Screening tests may be required if expired from previous cycle

Egg Thawing Package following unplanned Egg Freeze

£2,800

In the event of eggs needing to be frozen during an IVF cycle the cost of the subsequent egg thaw package is reduced.

Egg Thawing Package with Embryo Freeze

£1,995

Includes embryo freeze (storage fees payable if not used within 1 year)

Ovulation Induction

A non-invasive treatment to encourage and induce ovulation given via oral medication.

You can choose to either pay £650, to cover the cost of all scans, including a pregnancy scan if applicable, otherwise you can opt to “pay as you go”. Tracking scans are individually charged at £195 and pregnancy scans £250.

All fees exclude the cost of medication required for your cycle, which is approximately £150.

Ovulation Induction

£650

Pregnancy Test by Blood

Two pregnancy tests are usually required 48 hours apart to assess the rise in HCG levels.

HCG

£100

2 pregnancy tests plus nurse phone call

£200

Pregnancy Scans

Pregnancy Scan with a sonographer

£250

We can also offer an early pregnancy wellbeing scan

- 8-week scan & result discussed with consultant £400
- 8-week scan & results discussed with consultant & 10-week scan with a sonographer £550

Egg Sharing

IVF Egg Sharing with an Anonymous Recipient S1

Egg sharing involves donating half of the eggs collected during your IVF cycle to an anonymous recipient who is unable to produce good quality eggs of their own.

Our S1 package includes everything you will need for a standard IVF cycle.

This package may be of interest if you would like to help another patient to have a child through the gift of egg sharing, and if you are not eligible for NHS funded Treatment or you have had an unsuccessful NHS funded cycle. *Eligibility criteria apply.*

A minimum of 8 eggs is required for the donation to take place. If less than 8 eggs are retrieved, the sharer keeps all of the eggs, and the donation is cancelled (at no extra cost).

When booking a medical consultation as part of a treatment package a non-refundable deposit of £500 is payable. You will receive an invoice for the package balance that must be paid prior to your treatment starting.

Fees include:

£1,000

- Medical consent treatment consultation & nursing consultations
- Screening tests for sharer & partner, if applicable
- Up to 6 counselling sessions
- Stimulation cycle for sharer
- Semen preparation of partner sperm, if applicable
- Egg retrieval
- Attempted fertilisation of at least 4 eggs
- Embryo transfer
- Pregnancy scan or follow up appointment within 3 months
- Blastocyst culture of embryos & Embryoscope
- All drugs for sharer
- HFEA Fee £85

Extras if required:

- | | |
|---|--------|
| • Donor Sperm for 1 cycle (incl. storage for 12 months from reservation) | £1,300 |
| • Donor Sperm for 3 cycles (incl. storage for 12 months from reservation) | £3,400 |
| • ICSI, if required (50% discounted) | £675 |
| • Zymot, if required for ICSI | £200 |
| • Egg/Embryo Freezing & storage for 1 year, if required | £600 |

IVF Egg Sharing with Partner or Known Recipient & an Anonymous Recipient S2

An egg sharing package for patients who wish to donate half their eggs to their partner and the other half to an anonymous recipient who is unable to produce good quality eggs of their own.

This package is also suitable for patients who have found their own egg donor who is willing to share half their eggs with an anonymous recipient. *Eligibility criteria apply.*

A minimum of 8 eggs is required for the donation to the anonymous recipient to take place. If less than 8 eggs are retrieved, the known recipient keeps all the eggs and the donation to the anonymous recipient is cancelled at no extra cost.

When booking a medical consultation as part of a treatment package a non-refundable deposit of £500 is payable. You will receive an invoice for the package balance that must be paid prior to your treatment starting.

Fees include:

£1,500

- Medical consent treatment consultation & nursing consultations
- Screening tests for donor, known/partner recipient, & partner, if applicable
- Counselling
- Stimulation cycle for donor
- Semen preparation of partner sperm, if applicable
- Egg retrieval
- Attempted fertilisation of at least 4 eggs
- Scans & preparation for known recipient
- Pregnancy scan or follow up appointment within 3 months
- All drugs for donor & known recipient
- Blastocyst culture of embryos & EmbryoScope
- HFEA Fee £85

Extras if required:

- | | |
|---|--------|
| • Donor Sperm for 1 cycle (incl. storage for 12 months from reservation) | £1,300 |
| • Donor Sperm for 3 cycles (incl. storage for 12 months from reservation) | £3,400 |
| • ICSI, if required (50% discounted) | £675 |
| • Zymot, if required for ICSI | £200 |
| • Egg/Embryo Freezing & storage for 1 year, if required | £600 |

IVF Egg Freezing and Share S3

Egg freezing offers the opportunity to prepare for a future family whilst your fertility is most likely to be at its optimum. Freezing eggs allows you to plan a family when the time is right for you, and it also removes potential concerns about your biological clock.

Age is a major factor when considering egg freezing. Fertility is typically at its peak for individuals in their twenties, as we are likely to have the most and the highest quality eggs when we are younger. Ideally, the optimum time to have this procedure is in your twenties or early thirties, but you should always discuss this with your consultant who can give individual guidance.

Egg freezing and share involves donating half the eggs collected during your egg freeze cycle. The donated eggs will be allocated to an anonymous recipient(s) who cannot produce good quality eggs of their own. Eligibility criteria apply.

Our S3 package includes everything you will need for one standard egg freeze cycle.

A minimum of 12 eggs are required for the donation to take place. If less than 12 eggs are retrieved, you will be given the option to keep all the eggs for your future treatment (*additional freezing and storage fees would apply).

Fees include:

£500

- Medical consent treatment consultation, nursing & embryology consults
- Screening tests for sharer
- Counselling
- Stimulation cycle for sharer
- Egg retrieval
- All drugs for sharer
- Egg Freezing & storage for 1 year

Extras if required:

- | | |
|---|------|
| • Egg Freezing & storage for 1 year (if fewer than 12 eggs are retrieved) | £600 |
| • Egg storage for 1 year, after initial 12 months | £350 |

Egg & Embryo Recipient

IVF Recipient of Shared Eggs R1

Either treatment with eggs donated by an altruistic donor whose eggs are shared between two anonymous recipients or treatment with eggs from a patient who is having IVF treatment and who donates half their eggs to an anonymous recipient.

When booking a medical consultation as part of a treatment package patients are required to pay a non-refundable deposit of £500 for your treatment. You will receive an invoice for the package balance that must be paid prior to your treatment starting.

Fees include:

£8,295

- Medical consent treatment consultation & nursing consultations
- Screening tests for recipient & partner, if applicable
- Counselling
- Ultrasound scans
- Semen preparation of partner sperm, if applicable
- Attempted fertilisation of at least 4 eggs
- Blastocyst culture of embryos & EmbryoScope
- Embryo transfer for recipient
- Pregnancy scan or follow up appointment within 3 months

Fees exclude:

- | | |
|---|-----------|
| • HFEA Fee | £85 |
| • Drugs for recipient, approximately | £250-£700 |
| • Donor Sperm for 1 cycle (incl. storage for 12 months from reservation) | £1,300 |
| • Donor Sperm for 3 cycles (incl. storage for 12 months from reservation) | £3,400 |
| • ICSI, if required | £1,350 |
| • Zymot, if required for ICSI | £200 |
| • Egg/Embryo Freezing & storage for 1 year, if required | £600 |
| • Chlamydia (urine) | £70 |
| • Rubella Screen (blood) | £50 |
| • Trans-vaginal Ultrasound Assessment Scan | £195 |
| • Trial Embryo Transfer | £195 |

IVF Recipient of Eggs from Partner for Shared Motherhood R2

Treatment with eggs provided by partner for shared motherhood.

When booking a medical consultation as part of a treatment package patients are required to pay a non-refundable deposit of £500 for your treatment. You will receive an invoice for the package balance that must be paid prior to your treatment starting.

Fees include:

£7,850

- Medical consent treatment consultation & nursing consultations
- Screening tests for donor & recipient
- Counselling
- Ultrasound scans
- Stimulation cycle for donor
- Blastocyst culture of embryos & EmbryoScope
- Embryo transfer for recipient
- Pregnancy scan or follow up appointment within 3 months

Fees exclude:

- | | |
|---|---------------|
| • HFEA Fee | £85 |
| • Drugs for donor & recipient, approximately | £1,800-£2,800 |
| • Donor Sperm for 1 cycle (incl. storage for 12 months from reservation) | £1,300 |
| • Donor Sperm for 3 cycles (incl. storage for 12 months from reservation) | £3,400 |
| • ICSI, if required | £1,350 |
| • Zymot, if required for ICSI | £200 |
| • Egg/Embryo Freezing & storage for 1 year, if required | £600 |
| • Chlamydia (urine) | £70 |
| • Rubella Screen (blood) | £50 |
| • Trans-vaginal Ultrasound Assessment Scan | £195 |
| • Trial Embryo Transfer | £195 |

IVF Recipient of Eggs from a Known Donor R3

Treatment with eggs donated by a known donor who must be a patient of Complete Fertility.

When booking a medical consultation as part of a treatment package patients are required to pay a non-refundable deposit of £500 for your treatment. You will receive an invoice for the package balance that must be paid prior to your treatment starting.

Fees include:

£8,295

- Medical consent treatment consultation & nursing consultations
- Screening tests for donor & recipient & partner, if applicable
- Counselling
- Ultrasound scans
- Stimulation cycle for donor
- Semen preparation of partner sperm, if applicable
- Blastocyst culture of embryos & EmbryoScope
- Embryo transfer for recipient
- Pregnancy scan or follow up appointment within 3 months

Fees exclude:

- | | |
|---|---------------|
| • HFEA Fee | £85 |
| • Drugs for donor & recipient, approximately | £1,800-£2,800 |
| • Donor Sperm for 1 cycle (incl. storage for 12 months from reservation) | £1,300 |
| • Donor Sperm for 3 cycles (incl. storage for 12 months from reservation) | £3,400 |
| • ICSI, if required | £1,350 |
| • Zymot, if required for ICSI | £200 |
| • Egg/Embryo Freezing & storage for 1 year, if required | £600 |
| • Chlamydia (urine) | £70 |
| • Rubella Screen (blood) | £50 |
| • Trans-vaginal Ultrasound Assessment Scan | £195 |
| • Trial Embryo Transfer | £195 |

Recipient of Donated Embryos R4

Treatment with embryos donated from a patient who has undergone IVF treatment with Complete Fertility.

When booking a medical consultation as part of a treatment package patients are required to pay a non-refundable deposit of £500 for your treatment. You will receive an invoice for the package balance that must be paid prior to your treatment starting.

Fees include:

£5,500

- Medical consent treatment consultation & nursing consultations
- Screening tests for recipient
- Counselling
- Allocation of at least 2 frozen donor embryos (blastocyst stage)
- Ultrasound scans
- Frozen embryo transfer for recipient
- Administration fee
- Pregnancy scan or follow up appointment within 3 months
- Storage of any remaining embryos for one year (if applicable)

Fees exclude:

- | | |
|--|-----------|
| • HFEA Fee | £85 |
| • Drugs for recipient, approximately | £250-£750 |
| • Subsequent frozen embryo transfer cycle(s) for any remaining embryos | £2,045 |
| • Sibling embryo reservation, if available, including storage for 1 year | £1,500 |
| • Embryo storage per additional year | £350 |
| • Chlamydia (urine) | £70 |
| • Rubella Screen (blood) | £50 |
| • Trans-vaginal Ultrasound Assessment Scan | £195 |
| • Trial Embryo Transfer | £195 |

Recipient of Donated Frozen Eggs R5

Treatment with frozen eggs donated from a patient who has undergone IVF treatment with Complete Fertility.

When booking a medical consultation as part of a treatment package patients are required to pay a non-refundable deposit of £500 for your treatment. You will receive an invoice for the package balance that must be paid prior to your treatment starting.

Fees include:

£10,000

- Medical consent treatment consultation & nursing consultations
- Screening tests for recipient & partner, if applicable
- Counselling
- Ultrasound scans
- Semen preparation of partner sperm, if applicable
- Attempted fertilisation of 6 eggs
- Blastocyst culture of embryos & EmbryoScope
- Embryo transfer for recipient
- Pregnancy scan or follow up appointment within 3 months
- ICSI

Fees exclude:

- | | |
|---|-----------|
| • HFEA Fee | £85 |
| • Drugs for recipient, approximately | £250-£750 |
| • Donor Sperm for 1 cycle (incl. storage for 12 months from reservation) | £1,300 |
| • Donor Sperm for 3 cycles (incl. storage for 12 months from reservation) | £3,400 |
| • Embryo freezing & storage for one year | £600 |
| • Additional eggs, if available, up to extra 5 | £500 |
| • Chlamydia (urine) | £70 |
| • Rubella Screen (blood) | £50 |
| • AMH Test (blood) | £120 |
| • Trans-vaginal Ultrasound Assessment Scan | £195 |
| • Trial Embryo Transfer | £195 |
| • Zymot, if required for ICSI | £200 |

Transport & Storage

Gamete / Embryo Transport

Patients that have sperm, eggs or embryos stored at another fertility clinic and they wish to transport them to Complete Fertility for treatment, or who wish to transport their samples stored at Complete to another centre for treatment, the following fees apply:

●	Arrangement of transfer of gametes or embryos to/from a clinic within the UK	£300
●	Arrangement of transfer of gametes or embryos to/from a clinic outside of the UK	£1,000

Freezing & Storage

Patients may wish to freeze and store sperm for a multitude of different reasons: low sperm count ahead of IVF treatment ("back up freeze"), surgical sperm retrieval, medical treatment (for example for cancer) that may put their fertility at risk, vasectomy, gender transition, or military deployment, for example.

Anyone freezing sperm will also be required to be screened for HIV, Hepatitis B and Hepatitis C, and potentially other illnesses depending on their medical and travel history.

●	Egg/Embryo Freezing & storage for 1 year	£600
●	Sperm Freezing & storage for 1 year	£600
●	Egg, Embryo & all Sperm storage per additional year	£350

Medication

Private Prescription Charge

£75

Medication costs vary depending on your individual needs but please find an approximate cost range below. For IVF cycles we order enough medication to cover an average of 12 days of stimulation. If any further drugs are required, these will be discussed during your treatment. Please note that medication is non-refundable, including any unused drugs, but some surplus medication may be used in a subsequent cycle at a later date, if clinically appropriate.

A dispensing fee will be payable for each prescription, with all new cycles incurring a standard dispensing fee in the first instance.

Standard dispensing fee - £65

Top-up prescription dispensing fee (cold-chain) - £45

Top-up prescription dispensing fee (ambient) - £35

Same day delivery is available within mainland UK (excl. IOW) - up to £350 *dependent on delivery area*
