The **HFEA** (Human Fertilisation and Embryology Authority) is the UK government fertility regulator. It publishes the success rates and data for all clinics on its website.

The information provided in these graphics and tables is the most up-to-date data from Complete Fertility.

Information on success rates is of limited value in comparing centres and choosing where to seek treatment unless you visit [HFEA for advice](#) and information. For published success rate data, refer to the HFEA as the source of national information through its [Choose a Fertility Clinic](#) function.
